17th November 2017

Caroline,

We were absolutely delighted to receive a gift from the Sporting Bears Motor Club from the proceeds of the Bears efforts at the Camberley Car Show.

As you will be aware we have now merged with Kids Kidney Research. By combining forces we want to create an even stronger platform to drive innovation in understanding and treating childhood kidney diseases. The money you have raised, and any money you raise in the future, has been allocated for paediatric research.

During the recent call for paediatric research grants we had a large number of applications. We are currently reviewing these so that we can understand where best to invest the available funds as we know there will be some we have to turn down. Your fundraising continues to be put to good use and your support is vital. We are really very grateful to the Bears for all of your hard work and continued support.

It was great to meet David and Huw at the recent Kids Kidney Research 50th anniversary reception and to hear more about Sporting Bears and the fantastic work you do for so many charities. I'm very much hoping that I'll be able to get to a Bears event in the near future to experience it as it sounds brilliant.

With best wishes,

A handwritten signature in blue ink that reads "Tracey Murray".
